ENVIRONMENT AND RECYCLING

OPERATION

1. General information

The chapter "Operation" is intended for appliance users and qualified contractors.

The chapter "Installation" is intended for qualified contractors.

Note

Read these instructions carefully before using the appliance.
Keep this manual safe.
Pass on the instructions to any new user if required.

1.1 Safety instructions

1.1.1 Structure of safety instructions

KEYWORD Type of risk

Here, possible consequences are listed that may result from failure to observe the safety instructions.

► Steps to prevent the risk are listed.

1.1.2 Symbols, type of risk

Symbol	Type of risk
	Injury
	Electrocution
	Burns (burns, scalding)

1.1.3 Keywords

KEYWORD	Meaning
DANGER	Failure to observe this information will result in serious injury or death.
WARNING	Failure to observe this information may result in serious injury or death.
CAUTION	Failure to observe this information may result in non-serious or minor injury.

1.2 Other symbols in this documentation

Note

General information is identified by the symbol shown on the left.

► Read these texts carefully.

Symbol	Meaning
	Material losses (Appliance and consequential losses, environmental pollution)
	Appliance disposal

► This symbol indicates that you have to do something. The action you need to take is described step by step.

1.3 Units of measurement

Note

All measurements are given in mm unless stated otherwise.

2. Safety

2.1 Intended use

This device is intended to be used with instantaneous water heaters DHB-E SLi, DHB STi and HDB-E Si.

This appliance is intended for domestic use. It can be used safely by untrained persons. The appliance can also be used in a non-domestic environment, e.g. in a small business, as long as it is used in the same way.

Any other use beyond that described shall be deemed inappropriate. Observation of these instructions and of instructions for any accessories used is also part of the correct use of this appliance.

2.2 General safety instructions

CAUTION Burns

There is a risk of scalding at outlet temperature in excess of 43°C

WARNING Injury

The appliance may be used by children aged 8 and up and persons with reduced physical, sensory or mental capabilities or a lack of experience and know-how provided that they are supervised or they have been instructed on how to use the appliance safely and have understood the resulting risks. Children must never play with the appliance. Children must never clean the appliance or perform user maintenance unless they are supervised.

3. Appliance description

This hardwired remote control enables the user to operate the instantaneous water heater exclusively via the remote control. The data transfer between the hardwired remote control and the instantaneous water heater occurs by means of the integral adapter assembly and a cable.

3.1 Operation

The required DHW outlet temperature of the instantaneous water heater can be selected via the temperature selector on the hardwired remote control.

- 1 Selector
- 2 Setting range minimum
- 3 Setting range maximum

Turn the temperature selector to the required temperature. At times, the outlet temperature of the instantaneous water heater may differ from the set temperature.

Note

If the outlet temperature is not sufficiently high when the draw-off valve is fully open and the temperature selector is set to maximum, then more water is flowing through the appliance than can be heated by the heating system (appliance is at its output limit).

► Reduce the flow at the draw-off valve, this will allow the system to achieve the required temperature again.

4. Cleaning, care and maintenance

► Never use abrasive or corrosive cleaning agents. A damp cloth is sufficient for cleaning the appliance.

5. Troubleshooting

See chapter "Troubleshooting" in the instantaneous water heater instructions.

INSTALLATION

6. Safety

Only a qualified contractor should carry out installation, commissioning, maintenance and repair of the appliance.

6.1 General safety instructions

We guarantee trouble-free function and operational reliability only if original accessories and spare parts intended for the appliance are used.

6.2 Instructions, standards and regulations

Note

Observe all applicable national and regional regulations and instructions.

6.3 Relevant documents

Operating and installation instructions of the instantaneous water heater

7. Appliance description

The hardwired remote control is intended for use with instantaneous water heaters. The hardwired remote control enables the user to operate the instantaneous water heater located in a different room, such as the kitchen or bathroom. The hardwired remote control can also be used for instantaneous water heaters mounted on a self-supporting frame.

The hardwired remote control operates with low voltage.

7.1 Standard delivery

The following are part of the standard delivery of the hardwired remote control:

- 1 Adaptor assembly
- 2 Sleeve

7.2 Required accessories

Wall Mount holder for accommodating the FB 1 LCD hardwired remote control together with frame and screws:

A-Plus (HK) Group Ltd. - 222419c

8. Installation

- Isolate the instantaneous water heater from the power supply.
- For details on opening and closing the instantaneous water heater and on installing the adaptor assembly, see the operating and installation instructions of the instantaneous water heater.

8.1 Control cable

- Use a telephone cable as control cable (without metal screen); see chapter "Specification".
- The control cable can optionally be routed into the instantaneous water heater through the free cable grommet.

- Prepare the control cable for the adaptor assembly. Determine the required cable length for the selected cable grommet.
- When using the lower cable grommet, route the control cable to the adaptor assembly along the heater element.

8.2 Converting the instantaneous water heater

- 1 High limit safety cut-out slot
- 2 Sleeve

- Undo the plug on the high limit safety cut-out at the PCB of the instantaneous water heater.
- Widen the insulating hose and fully place the switching wires from the high limit safety cut-out into the insulating hose.
- Fit the plug of the high limit safety cut-out onto the instantaneous water heater slot.

INSTALLATION

Installation

8.3 Fitting the adaptor assembly

- Open the adaptor assembly casing by pushing in both lateral snap hooks.
- Connect the control cable to the terminal. Ensure the correct wires are connected to the adaptor assembly terminal and the programming unit.
- Guide the control cable through the cable entry. Ensure the terminal is seated correctly on the PCB (terminal inside the marked frame).
- Close the casing.

1 Adaptor assembly

- Fit the plug of the adaptor assembly onto the instantaneous water heater slot X11.
- Mount the adaptor assembly into the top of the instantaneous water heater.
- Fit the appliance cover to the instantaneous water heater.

8.4 Installation site

- Mount the hardwired remote control vertically on the Wall Mount Holder. As an alternative, the device may also be mounted over a wall recess. For the maximum distance to the instantaneous water heater, see chapter "Specification".

8.5 Mounting the Wall Mount Holder

- Prepare the telephone cable:
Remove 35 mm of sheath insulation and strip 6mm of the cable ends.

8.6 Mounting the Control Panel

- 1 Control cable
- 2 Base
- 3 Cover
- 4 Screws as delivered
- 5 Socket terminal
- 6 Control panel

INSTALLATION

Commissioning

- Fit the components; see diagram. Ensure the correct wires are connected to the programming unit terminal and the adaptor assembly.
- Click the fascia and programming unit into place.
- Loosen the motherboard from the control unit. Do so by pulling the board upwards with the thumbs at the bottom connector, loosening the three right-hand engagement hooks one after the other at the same time.

- Replace the thermostat fly lead cable (7) on the motherboard with the terminal strip component (13) from the wall mount. Reinsert the motherboard in the control unit, doing so by first inserting the motherboard on the left then pressing down to the right. Check the correct positioning of the unit centre line and drive lug on the knob (correct installation is not otherwise possible).

9. Commissioning

WARNING Electrocution

Commissioning may only be carried out by a qualified contractor in accordance with safety regulations and the instructions supplied with the instantaneous water heater.

9.1 Appliance handover

- Explain the functions of the appliance to the user. Show the user how to operate the appliance.
- Make the user aware of potential dangers, especially the risk of scalding.
- Hand over these instructions as well as the instructions for any accessories being used.

10. Shutting down

- Isolate the instantaneous water heater from the power supply.

11. Recommissioning

See chapter "Commissioning" in the instantaneous water heater instructions.

12. Troubleshooting

Problem	Cause	Remedy
Programming unit without temperature indication.	The connecting cable is not plugged in.	Reconnect the cable.
	The connecting cable is faulty.	Check and replace the connecting cable, if required.
The temperature cannot be adjusted.	The programming unit is faulty.	Check and replace the programming unit, if required.
The instantaneous water heater is not responding to temperature adjustments.	The cable connection to the instantaneous water heater is faulty.	Check and replace the cable connection, if required.

13. Maintenance

DANGER Electrocution

Before any work on the appliance, disconnect all poles from the power supply.

Warranty

The warranty conditions of our German companies do not apply to appliances acquired outside of Germany. In countries where our subsidiaries sell our products, it is increasingly the case that warranties can only be issued by those subsidiaries. Such warranties are only granted if the subsidiary has issued its own terms of warranty. No other warranty will be granted. We shall not provide any warranty for appliances acquired in countries where we have no subsidiary to sell our products. This will not affect warranties issued by any importers.

Environment and recycling

We would ask you to help protect the environment. After use, dispose of the various materials in accordance with national regulations.
